

WARREN COUNTY WATER DISTRICT

ADOPTION NOTICE

The undersigned Warren County Water District
(Name of Utility)

of Warren County, Kentucky hereby adopts, ratifies, and
makes its own, in every respect as if the same had been originally
filed and posted by it, all tariffs and supplements containing rates,
rules and regulations for furnishing water
(Nature of Service)

service at Warren County in the Commonwealth of Kentucky,
filed with the Public Service Commission of Kentucky by _____
Morgantown Road Water District of Warren County,
(Name of Predecessor)

and in effect on the 1 day of January, 19 79,
the date on which the public service business of the said _____
Morgantown Road Water District was taken over by it.
(Name of Predecessor)

This notice is issued on the 22 day of March,
19 79, in conformity with 807 KAR 2:020, Section 9 of the Regulations
for the filing of Tariffs of Public Utilities with the Public Service
Commission of Kentucky.

Warren County Water District

RULES AND REGULATIONS

This regulation prescribes the requirements under which the Warren County Water District may implement a purchased water adjustment clause designed to recover the increased costs of water purchased, where the water utility is not financially able to absorb an increase from its supplier. This Purchased Water Adjustment Clause shall be in accordance with 807 KAR 5:067, as adopted by the Public Service Commission.

Section 1. Application for Change in Base Rate

The rates a water utility is currently authorized to charge its customers are based upon the wholesale cost of water to that water utility pursuant to valid contracts or wholesale tariffs on file with the Commission. For purposes of a purchased water adjustment clause, this wholesale rate shall be considered as the base rate, for purchased water and any increase or decrease in the base rate shall be considered the changed rate.

(1) In the event there is a change in the base rate, the utility shall file with the Commission the following information:

(a) A copy of the wholesale supplier's tariff effecting a change in the base rate and a statement from the wholesale supplier evidencing the effective date of the changed rate;

(b) A detailed statement of water purchased under the base rate for a month period ended within ninety (90) days of the filing date and showing billing both under such base rate and also under the changed rate;

(c) A detailed statement of water sold for the same month period;

(d) A balance sheet and statement of operating expenses and revenues for the most recent month period for which that information is available;

(e) In the event of an increase only, evidence that the water utility has notified its customers of the proposed rate revision;

(f) Revised tariff sheets reflecting the rates the applicant proposes to charge; and

(g) Such other information as the Commission may request for a proper determination of the purchased water adjustment.

RULES AND REGULATIONS

(2) The Commission may require that the balance sheet and statement of expenses and revenues furnished pursuant to subsection (1)(d) of this section be updated to within ninety (90) days of the filing of an application and that the updated information correspond to the same month period as the water purchased information furnished pursuant to subsection (1)(b) of this section.

(3) Upon receipt of all the necessary information, the Commission will review the effect of the changed rate upon the applicant's operations and if an increase is proposed, determine whether all or part of the increase can be absorbed by the applicant. An applicant shall not implement its proposed revised rates until the Commission issues an order authorizing the applicant to adjust its rates. If an adjustment is authorized, the supplier's changed rate shall become the supplier's base rate for use in future applications.

(4) The maximum amount of the adjustment so ordered shall not produce revenue adjustments greater than the difference between the purchased water billed at the base rate and the purchased water billed at the changed rate.

(5) The notice required by subsection (1)(e) of this section may be accomplished by a bill insert.

Section 2. Calculation of the Purchased Water Adjustment

If a change is made in a base rate charged to a water utility by its supplier(s), the unit charges of the wholesale tariff shall be increased or decreased by a purchased water adjustment calculated as follows:

(1) Water purchases shall be computed at the supplier's base rate and the supplier's changed rate using a period of twelve (12) calendar months ending within ninety (90) days preceding the month of the effective date of the supplier's rate change. The difference between these amounts shows the total change in the applicant's purchased water costs.

(2) The total change in purchased water costs shall be divided by the actual number of cubic feet or gallons sold, yielding the purchased water adjustment expressed in cents per cubic feet or gallons, unless the applicant's water loss exceeds fifteen (15) percent.

(3) In instances where the water loss exceeds fifteen (15) percent, the actual water sales shall be divided by eighty-five (85) percent yielding the maximum allowable water

RULES AND REGULATIONS

purchases. The maximum allowable water purchases shall then be multiplied by the change in cost per cubic foot or gallons, yielding the total allowable change. The total allowable change shall then be divided by the actual number of cubic feet or gallons sold, yielding the purchased water adjustment expressed in cents per cubic feet or gallons.

Section 3. Procedure for Distribution of Refunds from Suppliers

In the event a water utility receives a refund from its supplier for amounts previously paid, the water utility shall immediately apply to the Commission for authority to make adjustments on the amounts charged customers' bills under this regulation as follows:

(1) The total refund received by the water utility shall be divided by the number of cubic feet or gallons of water the water utility estimates it will sell to its customers during the two (2) month period beginning with the first day of the month following receipt of the refund, yielding the refund factor to be applied against each cubic foot of water sold thereafter.

(2) Effective with meter readings taken on and after the first day of the second month following receipt of the refund, the water utility will reduce by the refund factor any purchased water adjustment that would otherwise be applicable during the period. The period of reduced purchased water adjustment shall be adjusted, if necessary, in order to most nearly approximate the total amount to be refunded. The water utility shall make full distribution of the refund within two (2) months.

(3) In the event a water utility receives a large or unusual refund, the water utility may apply to the Commission for a deviation from the procedure for distribution of refunds specified herein.

Base Rate: Northside .3561 per 1,000 Gallons

RULES AND REGULATIONS

1. Additional Rules and Regulations. These Rules and Regulations are in addition to the rules of the Kentucky ~~Public Service Commission~~ Utility Regulatory Commission.
2. Application for Service. Each prospective customer desiring water service may be required to sign the District's standard Application for Water Service before service is supplied by the District. No service will be installed unless there is a main distribution line existing along the road from which service is requested. If service is desired on the same side of the road as the water main, the meter shall be installed within 5 feet of the water main. If service is desired on the opposite side of the road from the water main, the service line will be run under the road and the meter installed on private property adjacent to the highway right of way, provided the distance from the main line to the meter point is not more than 60 feet. If the distance is greater than 60 feet, the customer will be required to pay the cost of installing the pipe for the additional footage.

A. Residential

A contribution in aid of construction as provided in the Schedule of Rates and Charges must be paid on all new connections to the existing water line.

B. Commercial

Rules and regulations for commercial service, except as noted below, are the same as for residential service.

A commercial customer, or large-quantity user, will be required to pay a contribution in aid of construction determined by the size of metering equipment as provided in the Schedule of Rates and Charges. In addition to the connection fee, the customer shall pay the cost of installing all service line bores or open cuts which extend beyond 5 feet of the water main.

3. Discontinuance of Service by District. District may refuse to connect or may discontinue service for the violation of any of its Rules and Regulations, or for violation of any of the provisions of the Schedule of Rates and Charges, or of the application of customer or contract with customer. District may discontinue service to customer for the theft of water or the appearance of water theft devices on premises of customer. The Discontinuance of service by District for any causes as stated in this rule does not release customer from his obligation to District for the payment of minimum bills as specified in application of customer or contract with customer.

RULES AND REGULATIONS

All water line extensions will be in compliance with 807 KAR ^{25:050}~~2:040~~ Section 12.

In summary each customer who hooks on along the line extended will pay our standard tap fee (residential -- \$250.) The developer will receive \$125 rebate for each connection along the extension.

If the developer desires service along the line extended, he too will pay the standard tap fee just as any other customer. The water district will return to him 50 percent of the fee. On a residential tap fee this would amount to \$125, which would be more than the cost for extending the average distribution line for 50 feet.

Should service be desired on the opposite side of the road from the water main, the District will cross the road with the residential service line at no additional cost.

RULES AND REGULATIONS

4. Billing. Bills will be rendered monthly and shall be paid within ten days from date of bill at the office of District. Failure to receive bill will not release customer from payment obligation. Should bills not be paid as above, service will be discontinued in accordance with the applicable URC law. Bills paid on or before the final date of payment shall be payable at the net rates, but thereafter the gross rates shall apply as provided in the Schedule of Rates and Charges. Should the final date for payment of the bill at the net rates fall on a Sunday or holiday, the business day next following the final date will be held as a day of grace for delivery of payment.
5. Deposit. A deposit or suitable guarantee equal to approximately twice the average monthly water bill may be required of any customer before water service is supplied. The District may at its option return the deposit to the customer after one year. Upon termination of service, deposit may be applied by the District against any unpaid bills of the customer, and if any balance remains after such application is made, said balance shall be refunded to customer. Interest will be paid as required.
6. Point of Delivery. The point of delivery is the point where the meter is located on the customer's premises. All water lines, plumbing, and equipment beyond the meter shall be installed and maintained by the customer.
7. Termination of Contract by Customer. Customers who have fulfilled their contract terms and wish to discontinue service must give at least three (3) days' written notice to that effect, unless contract specified otherwise. Notice to discontinue service prior to expiration of contract term will not relieve customer from any minimum or guaranteed payment under any contract or rate.
8. Customer's Service Line. All service lines beyond the metering point should be installed of material consisting of copper, galvanized, or PVC pipe with rating of not less than 160 psi. The size of service line beyond the point of delivery should not be less than 3/4"; however, a larger size may be needed to provide adequate service. If the customer's point of use is at a higher elevation than the point of delivery, the customer should consult with a reputable engineering firm to size the service line from the point of delivery.
9. Right of Access. The customer must agree to permit the District to lay, maintain, repair, or remove such water lines which is the property of the District located on the customer's property with the right of ingress and egress over customer's property. The District's duly authorized representative and/or other duly authorized employee of the State Health Department bearing proper credentials and identification shall be permitted to enter upon all properties for the purpose of inspection, observation, measurement, sampling, and testing, in accordance with the provisions of these Rules and Regulations.

10. Interruption of Service. The District will use reasonable diligence in supplying water service, but shall not be liable for breach of contract in the event of, or for loss, injury, or damage to persons or property resulting from interruptions in service, excessive or inadequate water pressure, or otherwise unsatisfactory service, whether or not caused by negligence.
11. Additional Load. The service connection supplied by the District for each customer has a definite capacity, and no addition to the equipment or load connected thereto will be allowed except by consent of the District. Failure to give notice of additions or changes in load, and to obtain the District's consent for same, shall render the customer liable for any damage to any of the District's lines or equipment caused by the additional or changed installation.
12. Notice of Trouble. Customer shall notify the District immediately should the service be unsatisfactory for any reason, or should there be any defects, trouble, or accidents affecting the supply of water. Such notices, if verbal, should be confirmed in writing.
13. Nonstandard Service. Customer shall pay the cost of any special installation necessary to meet his peculiar requirements for service other than standard water tap.
14. Scope. This Schedule of Rules and Regulations is a part of all contracts for receiving water service from the District, and applies to all service received from the District whether the service is based upon contract, agreement, signed application, or otherwise. A copy of this schedule, together with a copy of the District's Schedule of Rates and Charges, shall be kept open to inspection at the office of the District.
15. Damage to District's Water System. No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the District's water works. Any person violating this provision shall be subject to immediate arrest and discontinuation of water service and shall pay the cost of repairing or replacing the pipe or appurtenance.
16. Water Line Extension. An applicant desiring an extension to a proposed real estate subdivision will be required to pay the entire cost of the extension. An agreement must be executed by the developer a copy of which is attached. Individual service applications will be in accordance with Rule No. 2.

SUBJECT: Charges for Special Non-recurring Services

Regular working hours are 7:30 a.m. - 3:00 p.m. Monday - Friday (excluding holidays.) After hours charge is any other time.

The following charges for special non-recurring services shall be made:

1. Service Connection Charge. A charge of \$25 shall be made for all service reconnections made during regular working hours, except that there shall be no connection charge made for service on the original installation of facilities. If service is reconnected other than during regular working hours, the charge shall be \$65.
2. Delinquent Service Charge. A charge of \$25.00 shall be made for a trip to collect a delinquent account or terminate service. Where a customer's service has been discontinued for nonpayment of bills and the delinquent customer has paid his or her outstanding bills for service and requested reconnection, the water district shall assess a service connection charge in addition to a delinquent service charge to re-establish water service.
3. Meter Reading Recheck Charge. A charge of \$25.00 shall be made for a trip to recheck a meter reading when the customer requests the meter to be rechecked for a correct reading and the meter was not misread.
4. Meter Test Request. Upon request a customer may have his meter tested and adjustments will be made to the bill where the meter is found to be more than 2 percent fast or slow in accordance with 807:KAR 5:006, Section 18, provided request by the customer is not more frequent than once each twelve months. If such test shows the meter to be less than 2 percent fast, a \$50.00 charge shall be made.

Address

Issued by authority of an Order of the Public Service Commission of Kentucky in Case No. 1999-373
dated December 27, 1999.

5. PSC Meter Test Complaint. Any customer of the District may request a meter test by written application to the Public Service commission, Post Office Box 615, Frankfort, KY 40602.
6. Service Investigation Charge. A charge of \$25.00 per trip shall be made for service investigation during regular working hours if interruption of a service or service problem is associated with the customers own plumbing facilities and beyond the Water District delivery point and is not caused by failure of District's facilities. The charge for investigation after working hours will be \$65.00 per trip. Any maintenance and repair of facilities beyond District's delivery point is the responsibility of the customer.
7. Meter Investigation Charge. When an investigation of facilities on customers' premises reveals meter seals broken, damaged meters, or unauthorized use of water, a meter investigation fee of \$75.00 shall be charged. The actual cost of repairing damage to the meter service or other Water District facilities, if any, shall also be charged and the customers' bill shall be paid for the amount of water service rendered.
8. Return Check Charge. When a check, including auto payment, is accepted for payment of a bill and the check is not honored by the financial institution, a return check charge \$25.00 shall be charged.
9. Service Line Inspection Charges. A charge of \$50.00 shall be made to inspect a customer's service line from the point of delivery at the meter service to the point of use. The service line inspection charge may be waived if confirmation is received from the Kentucky State Plumbing Inspector that a state plumbing permit has been obtained and the State Plumbing Inspector will inspect the service line.

RULES AND REGULATIONS

The following policy is prescribed for the customers in the area served by Warren County Water District (District). All other rates, charges, rules and regulations not specifically mentioned herein shall remain the same as those in effect under authority of this Commission prior to the effective date of this Order.

PROVISIONS FOR STANDARD SERVICE, NON-STANDARD SERVICE AND FIRE PROTECTION:

I. STANDARD SERVICE (Standard Water Tap)

- A. Based on information provided by the customer, the standard service size for a water tap shall be established by the Water District. Each customer's meter shall be properly sized to measure all water usage of the customer as determined by the Water District. The meter installation cost to meet the standard service size for each customer shall be paid for by each customer at the Water District's established contribution fee for the meter size required and the contribution fee as approved by the Kentucky Public Service Commission (PSC).
- B. Should a customer's rate of water flow and usage change such that the water meter will not accurately measure the water used, the customer shall be responsible for paying the Water District's established contribution fee based on the meter size required to accurately measure the water used. The Water District will refund to the customer the salvage value of the original metering equipment that can be recovered and reused.
- C. Any existing or proposed service connection which has minimum and/or maximum flow rates that do not fall within the range defined below for a Standard Service shall be considered a Non-Standard Service. The range of flow rates for a Standard Service with a particular meter size shall be as follows:
 - 1. The customer's low flow rate shall be greater than the 95 percent accuracy point for low flow registration of the meter.

RULES AND REGULATIONS

2. The customer's sustained high flow rate shall be less than the maximum continuous rate specified for the meter and the customer's intermittent high flow rate shall be less than the maximum for the normal operating range of the meter.

The low and high flow rates described above for each water meter size shall be as stated by the manufacturer of meters used by the Water District.

- D. Any service connection that involves fire protection facilities is a Non-standard Service.
- E. No unmetered water connection to the Water District's water mains will be allowed. All fire line service connections shall be metered.

II. NON STANDARD SERVICE

A customer shall make application for service and pay the actual cost of any special installation necessary to meet his peculiar requirements for service other than standard water tap.

III. FIRE PROTECTION

- A. The Water District will install fire hydrants for the City and County fire departments, or others provided the Water District is reimbursed for the cost of installation and the Water District's engineers determine that at the location the fire hydrant is to be installed, a flow rate from the fire hydrant will meet the requirements of the Kentucky Public Service Commission ("PSC").
- B. Fire hydrants installed prior to June 7, 1992, that have a flow rate of less than 250 GPM @ 20 psi residual pressure will be identified and the fire department advised in writing of the fire hydrant location.

RULES AND REGULATIONS

- C. While fire hydrants are provided as a service to the public within the Water District's service area, because of the potential for damage to the Water District's system and unmetered use of water at fire hydrants installed directly on the Water District's water mains, these fire hydrants are only to be used and operated for fighting fires by the fire departments.
- D. As a service to the public within its service area and for the protection of the public welfare, the Water District will furnish water to fight a fire from a fire hydrant connected directly to the Water District's water main at each fire location free of charge for a period not to exceed a total of 4 hours of usage-as defined below in Section H.1. In the event that more than 4 hours of usage occurs in fighting a fire, the owner of the property where the fire occurs shall pay for all of the water used in accordance with the Water District's standard water rate as in effect on the date of the fire and approved by the PSC.
- E. Fire hydrants shall not be used by any contractor, property owner, governmental agency, individual, corporation, or others to secure water for any purpose. The use of a fire hydrant by anyone other than properly authorized fire department personnel for fighting a fire shall be considered a "theft of service" and prosecuted in accordance with the laws of the Commonwealth of Kentucky. The user shall pay the Water District a a meter investigation charge as set forth in the Water District charges for special services as approved by the PSC, any damages to the Water District's property, and the full cost of the services fraudulently obtained along with all other applicable costs of the Water District allowed under the laws of the Commonwealth of Kentucky.
- F. The fire departments utilizing fire hydrants connected to the Water District's water main shall maintain a record of any water used, including the date, location, the time that the fire department began pumping water, the time that the fire department discontinued pumping water, the approximate rate(s) of flow, the length of any interruptions in pumping water, the cause of the fire, and property owner for whom the water was used and shall file a report with the Water District monthly. The record of the fire department in conjunction with the Water District's daily master meter readings and normal daily water usage for the service zone will be used in determining the amount of water used to fight a fire.

RULES AND REGULATIONS

- G. The District does not guarantee a water supply including the supply to the Customer's fire protection system at any particular flow rate or pressure. The fire flow may vary depending on other water demands on the system, various water facility limitations, or other circumstances (including but not limited to power failure, water main/line breakage, etc.). The customer will indemnify and hold harmless the District and its employees from and against all claims, damages, losses, and expenses incurred as a result of insufficient water supply including supply to the customer's fire protection system or any failure of the detector check valve installation, metering equipment, and/or appurtenances.
- H. For purposes of "III FIRE PROTECTION," the following definitions shall apply:
1. A "fire" as used hereinabove shall include any conflagration on a publicly or privately-owned property. Any re-ignition of a previously extinguished conflagration on the same property shall be considered a single fire and any fire resulting from the same cause shall be considered a single fire except that a fire on property owned by different persons or entities shall be considered separate fires.
 2. "Hours of usage" as used hereinabove is measured from the time the fire department begins pumping water at the scene of the fire until the fire department ceases pumping water to the fire. In the event the fire department ceases pumping water for a period of time but later continues pumping to the same fire, the "hours of usage" shall be tolled while no pumping occurs and continue to accumulate after pumping continues. Any partial hours of usage are rounded to the nearest hour.

SECTION 9 (1)

BY: RULES AND REGULATIONS
FOR THE PUBLIC SERVICE COMMISSION

I. Classification of Water Service for Purposes of Determining Exemptions from Sales and Use Tax.

A. Residential Classification

1. Use as a dwelling unit constituting a separate independent housekeeping establishment which is separately metered and occupied by one or more persons as a single housekeeping unit shall be deemed residential use. The name in which an account is established or billed is a non-determining factor and the structure to which service is to be provided may be under construction, occupied or unoccupied.
2. Agricultural use when provided through the same water meter utilized by the dwelling structure on the property shall be deemed residential use.
3. Water meter service installed on property that is intended for future residential use, whether the customer's service line is connected initially or planned to be connected in the future, shall be deemed residential use.

B. Non-residential Classification:

1. Any use other than a residential use as defined in Section A including specifically, but not by way of limitation, industrial and business usage.
2. Mobile home parks served by a single meter
3. Multiple dwelling units within one structure when all dwelling units are served by a single meter.

C. Determination of Usage

The determination of usage as to whether residential or nonresidential is based upon the principal purpose for which the water service when it was initially installed or for which the structure is being or has been constructed until the District has been notified by the owner in writing that the purpose for which the water service was installed has changed.

SECTION 9 (1)

RULES AND REGULATIONS

BY: Robert C. Johnston, III
FOR THE PUBLIC SERVICE COMMISSION

II. Usage from a Water Meter

- A. No more than one residence, including mobile homes may connect to one meter.
- B. A residence and any agricultural usage (with the exception of usage by a tenant dwelling or rental dwelling) may be supplied from the same water meter. A tenant dwelling or rental dwelling is considered a separate residence and must be supplied from a separate water meter.
- C. Where multiple apartment buildings under separate roofs are built on the same lot, each building must have one water meter. However, at the discretion of the property owner, each apartment within a building may have separate water meters.
- D. Each commercial, industrial, or any other entity must have a separate water meter. Excluding residential and apartment complexes, where a commercial, industrial, or other entity involves more than one structure on a single lot (lot approved by the local Planning Commission), which will be operated as one entity under one entity name, such property can be served by one water meter.
1. Should such property cease to be operated as one entity it will be required that separate water meters be paid for by the owner of each lot and the service line(s) from the meter(s) to the point of use be installed and paid for by the respective property owner(s).
- E. Where multiple residential, commercial, industrial or other such units are under one roof, one meter and service line is all that is required. If the property owner desires more than one meter, pays the appropriate contribution in aid of construction, and complies with the District's rules and regulations pertaining to application for service, additional meters may be installed.
- F. Mobile home parks on a single parcel of land, approved by the local Planning Commission as a mobile home park, are considered one business and may be served by one meter.

WARREN COUNTY WATER DISTRICT WATER SHORTAGE RESPONSE PLAN

JAN 13 2000

(Based on the Kentucky Water Shortage Response Plan - Revised 6/88) PURSUANT TO 807 KAR 5:011, SECTION 9 (1)

BY: Stephan D. Bell
SECRETARY OF THE COMMISSION

The KY Natural Resources and Environmental Protection Cabinet has established a Drought Notification System based on weather monitoring data, water resource scientists, and federal, state, and local agencies. Two levels of water shortage conditions have been identified.

1. Water Shortage Watch

The Cabinet will announce a Water Shortage Watch when water supply data indicate the potential for water shortages. Local governments and water utility managers are responsible for determining the need for local response and for making preparations for water shortages. The Cabinet must be kept informed of all shortages and actions taken in response to the shortage so the lifting of such measures can be accomplished.

Specific measures WCWD shall take when the Kentucky Division of Water issues a Water Shortage Watch are:

- a) Monitor water supplies daily. Refer to Section 2 "Evaluating Vulnerability to Water Shortages" to determine how much water the community has available and how much will be needed.
- b) Notify the Judge Executive if conditions indicate an inability of the treatment plant to supply the needs of the customers so the appropriate water shortage phase can be activated according to the severity of the conditions.
- c) Keep the Cabinet informed of all actions taken.

2. Water Shortage Warning

The Cabinet will announce a Water Shortage Warning when one or more water supply systems in an area have entered the emergency phase of a water shortage. Local governments and water utility managers should have already adopted water shortage response plans in their areas, and most systems should be in some phase of response to the shortage.

Specific measures WCWD shall take when the Kentucky Division of Water issues a Water Shortage Warning are:

- a) Continue to monitor raw water supplies and system demand daily.
- b) Notify the Judge Executive if conditions indicate an inability of the treatment plant to supply the needs of the customers so an appropriate water shortage phase can be activated according to the severity of the conditions.
- c) Keep the Cabinet informed of all actions taken.

Should water supply data and/or system demand data indicate an inability to supply customers at current operational levels, WCWD shall notify the Judge Executive who shall issue a water shortage notification to the public based on the severity of the situation. Notifications in order of severity are:

1. **Advisory Phase**
 - Issue water shortage advisory
 - Set conservation goals and prepare for decreasing supply
 - Inform the public about the potential problem
 - Request voluntary conservation (Expect only 5-15% reduction in demand)
2. **Alert Phase**
 - Issue water shortage alert
 - Set more stringent conservation goals
 - Restrict Class 3, non-essential, water uses to odd/even schedule
 - Request voluntary conservation for all water use
 - Inform the public about the problem
 - Monitor compliance with the restrictions on Class 3 use and enforce when necessary
3. **Emergency Phase**
 - Issue water shortage emergency declaration
 - Set more stringent conservation goals
 - Ban all Class 3 and restrict all Class 2 water uses
 - Inform the public
 - Enact conservation pricing
 - Monitor all drought-related activities, especially compliance with the bans. Enforce as necessary
4. **Rationing Phase**
 - Begin mandatory allocations of water
 - Immediately reduce usage by 25 percent
 - Ban Class 3 uses, restrict Class 2 and Class 1 water uses
 - Inform the public
 - Enact Conservation pricing
 - Set new conservation goals and monitor all shortage-related activities, especially compliance with the allocations. Enforce as necessary

Evaluating Vulnerability to Water Shortages

Three conditions exist which can create water shortage:

1. **Inadequate raw water supply**

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

JAN 13 2000

PURSUANT TO 807 KAR 5.011,
SECTION 9 (1)

BY: Stephan D. Bell
SECRETARY OF THE COMMISSION

- Big Barren River is controlled by the flood control dam at Barren River Lake and operated by the Army Corps of Engineers.
- Bowling Green Municipal Utilities owns and operates the Water Treatment Plant which supplies water on a contract basis to Warren County Water District.
- BGMU has a Water Shortage Supply Plan similar to Warren County Water District. It is attached as Exhibit A.

2. Increasing demand exceeding treatment capacity

See Exhibit C.

3. Increase demand exceeding distribution system capacity from BGMU

WCWD purchases its water supply from BGMU and may implement various phases of the Water Shortage Response Plan due to problems of the water transmission system to deliver water to the distribution system.

SECRETARY OF THE COMMISSION

EXAMPLES OF PRESS RELEASES

JAN 13 2000

Advisory Phase

PURSUANT TO 807 KAR 5:011,
SECTION 9 (1)

Warren County, KY - Due to the recent abnormally dry weather conditions and little indication of significant rainfall in the foreseeable future, residents of Warren County should begin conserving water. For the month(s) of _____, Warren County received only _____ percent of normal rainfall for the comparable period. The 30-day outlook from the National Weather Service calls for more abnormally dry weather.

The State of Kentucky has declared a local water shortage ADVISORY. At this time, there is an immediate need to begin voluntary conservation measures.

According to officials at the Kentucky Division of Water, consumers can cut water use by as much as 15% with very little difficulty or discomfort by using voluntary water conservation practices.

All non-essential uses of water should be minimized, such as watering lawns, washing cars, and hosing off pavement.

If everyone cooperates, the water usage in Warren County can be cut significantly. If you have questions or suggestions, please contact _____ at (270) 526-4656.

Alert Phase

Warren County, KY - A water shortage ALERT has been declared for the Warren County Water District service area.

(Describe the supply situation, given unrestricted water demand.)

Under the ALERT, and in order to ensure adequate supplies for necessary uses, citizens are urged to practice conservation in all use of water. Non-essential water use, is restricted according to the following schedule:

1. Outside use for addresses ending in an odd number shall be limited to Tuesdays, Thursdays and Saturdays.
2. Outside use for addresses ending in an even number shall be limited to Wednesdays, Fridays and Sundays.

Non-essential use includes ornamental watering, filling of swimming pools, washing of motor vehicles, driveway or pavement washing, refilling of air conditioning cooling towers, and the serving of water in restaurants except by request.

Conservation of all water uses, accompanied by these restrictions, can reduce water use by 15 - 30 percent. Warren County Water District customers can extend limited

water supplies, avoiding further restrictions, by observing these bans and conserving water at all times.

(Project results of compliance)

If everyone cooperates, the water usage in Warren County can be cut significantly. If you have questions or suggestions, please contact _____ at (270) 526-4656.

Definitions of Classes of Water Uses

PURSUANT TO 807 KAR 5:011,
SECTION 9 (1)

Minimum *See*
SECRETARY OF THE COMMISSION

Class 1 (Essential uses)

- Water necessary to sustain human life and pets, and to maintain standards of hygiene and sanitation
- Patient care and rehabilitation
- Water hauling sales for domestic use where not reasonably available elsewhere
- Firefighting
- Health and public protection purposes as approved by health officials and municipal governing body

Class 2 (Socially or Economically Important uses of Water)

- Personal, in-house water use including kitchen, bathroom and laundry
- Water hauling sales for non-domestic use when other sources are not reasonably available elsewhere
- Commercial car and truck washes
- Laundromats
- Restaurants, clubs, and eating places
- Schools, churches, motels/hotels and similar establishments
- Minimal watering of vegetable gardens
- Minimal watering of trees where necessary for their survival
- Agricultural irrigation of the production of food and fiber or the maintenance of livestock
- Watering by public gardens of community significance where necessary to preserve specimens
- Watering by commercial nurseries where necessary to maintain stock
- Watering where necessary to establish or maintain revegetation or landscape plantings required pursuant to law or regulation
- Watering of woody plants where necessary to preserve them
- Minimal water of golf course greens
- Operation of municipal swimming pools and residential pools that serve more than 25 dwelling units
- Air conditioning refilling for startup at the beginning of the cooling season
- Makeup of water during the cooling season
- Refilling of AC's specifically approved by health officials and the municipal governing body, where the system has been drained for health protection or repair services.

Class 3 (Non-essential Uses)

- Use of fire hydrants other than Class 1 & 2 uses, including use of sprinkler caps, testing fire apparatus, and fire department drills
- Flushing of sewers and hydrants except as needed to ensure public health and safety as approved by health officials and the municipal governing body
- Serving water in restaurants, clubs, or eating places except by customer request
- Failure to repair a controllable leak
- Increasing water levels in scenic and recreational ponds and lakes, except as

- necessary to support fish and wildlife
- Filling fountains, reflecting pools and artificial and artificial waterfalls
 - Watering of annual or non-woody plants, lawns, parks, golf course fairways, playing fields and other recreational areas
 - Washing down buildings or structures for purposes other than immediate fire protection
 - Flushing gutters or permitting water to run or accumulate in any gutter or street
 - Expanding nursery facilities, placing new irrigated agricultural land in production, or planting of landscaping except when required by a site design review process
 - Use of water for dirt control or compaction
 - Watering of lawns, parks, golf course fairways, playing fields and other recreational areas
 - Washing sidewalks, walkways, driveways, parking lots, tennis courts, or other hard-surface areas
 - Recreational uses other than those specified as Class 2
 - Non-commercial washing of motor and other vehicles
 - Refilling air conditioning cooling towers after draining

SECRETARY OF THE COMMISSION

WHEREAS, the Bowling Green Municipal Utilities and the Warren County Water District have recommended that the City Commission and Warren County adopt a water shortage response program to provide for the declaration of official phases of water supply shortage situations and the implementation of voluntary and mandatory water conservation measures throughout the City of Bowling Green and Warren County in the event a shortage is declared; and

WHEREAS, the Board of Commissioners hereby determines that it is in the best interests of the City to adopt such a program.

NOW, THEREFORE, BE IT ORDAINED by the City of Bowling Green, Kentucky, as follows:

1. A new subsection of Chapter 23 (Water and Sewer) is created to read as follows:

23-2.28 Water Shortage Response.

- a. Whenever the General Manager or the acting General Manager of Bowling Green Municipal Utilities (BGMU) and the Manager or the acting Manager of the Warren County Water District, the public purveyors of potable water in the City of Bowling Green and Warren County, find that a potential shortage of the supply of treated water exists or will exist, upon written certification thereof to the Mayor of the City of Bowling Green and the Judge Executive of Warren County, the Mayor and the Judge Executive may publicly declare a "Water Shortage Advisory." In addition to the declaration, the Mayor and the Judge Executive shall call upon all customers of BGMU and the Warren County Water District to employ voluntary water conservation and to

- eliminate the waste of all treated water.
- b. Whenever the General Manager or the acting General Manager of BGMU and the Manager or the acting Manager of the Warren County Water District, the public purveyors of potable water in the City and Warren County, find that a condition exists where they will not be able to meet the expected needs of their customers, upon written certification thereof to the Mayor and the Judge Executive of Warren County, the Mayor and Judge Executive may publicly declare a "Water Shortage Alert." In addition to the declaration, the Mayor and Judge Executive may call upon all customers of BGMU and the Warren County Water District to employ voluntary water conservation and to eliminate the waste of all treated water and to use treated water outside of buildings (such usage to include, but not limited to, car washing, driveway washing, filling of swimming pools, use and filling of fountains and watering of lawns, bushes and trees) only in accordance with the following schedule:
- (1) Outside use for addresses ending in an odd number shall be limited to Tuesdays, Thursdays and Saturdays; and
 - (2) Outside use for addresses ending in an even number shall be limited to Wednesdays, Fridays and Sundays.
- c. Whenever the General Manager or the acting General Manager of BGMU and the Manager or the acting Manager of the Warren County Water District find that BGMU and the Water District are unable to meet the expected needs of their customers and that such a condition will exist for some period of time in the future, and upon written certification thereof to the Mayor and Judge Executive of Warren County, the Mayor and Judge Executive may publicly declare a "Water Shortage Emergency." In addition to the declaration, the Mayor and Judge Executive may call

PURSUANT TO 807 KAR 5.011,

upon all customers of BGMU and the Water District to employ voluntary water conservation and

BY: Stephan D. Bell

SECRETARY OF THE COMMISSION

to eliminate the waste of all treated water, to eliminate the use of water outside of buildings and

to use water only as necessary to maintain minimum standards of hygiene and sanitation and to provide for essential health and public protection purposes.

- d. Whenever the Mayor and Judge Executive have declared a "Water Shortage Alert" or "Water Shortage Emergency" pursuant to paragraph b and c of this subsection, they or BGMU and the Warren County Water District may promulgate such administrative regulations governing all water usage in Bowling Green and Warren County by all customers of BGMU and the Water District as may, in the discretion of the Mayor and Judge Executive appear necessary to protect the health and public safety of the residents in Bowling Green and Warren County in a manner consistent with the terms of this subsection.
- e. The declaration of a water shortage advisory, water shortage alert or water shortage emergency shall continue until the General Manager or the acting General Manager of BGMU and the Manager or the acting Manager of the Warren County Water District find that the conditions calling for the declaration no longer exist and upon written certification thereof to the Mayor and Judge Executive, the Mayor and Judge Executive may publicly declare the condition no longer existing.
- f. In the event there is a water supply shortage in the service area of either BGMU or Warren County Water District, but not both, then the appropriate member of management of the utility experiencing the shortage shall only make the certifications referred to above to the public official who appoints the members of its governing body and that public official may act alone as provided above.

CC: DAVID M,
JILL H.

(Ordinance No. BG99 - 37)

g. Any person who violates the provisions of paragraph b of this subsection shall be subject to a fine not to exceed two hundred fifty dollars (\$250.00). Any person who violates the provisions of paragraph c of this subsection shall be subject to a fine not to exceed two hundred fifty dollars (\$250.00) and up to ninety (90) days imprisonment. Each day in violation of the terms of paragraph b and c of this subsection shall constitute a separate offense.

2. The provisions of this Ordinance are hereby declared to be severable and, if any section, phrase or provision shall, for any reason, be declared invalid, such declaration of invalidity shall not affect the validity of the remainder of this Ordinance.

3. All prior Municipal Orders or Ordinances or parts of any Municipal Order or Ordinance in conflict herewith are hereby repealed.

4. This Ordinance is adopted pursuant to KRS 83A.060 in that it was introduced on August 9, 1999, and given final reading on August 10, 1999, and said Ordinance shall be in full force and effect upon signature, recordation and publication in summary pursuant to KRS Chapter 424.

ADOPTED: August 10, 1999

APPROVED: Eldon J. Renaud
Mayor, Chairman of Board of Commissioners
